Introduction

BLISS GVS PHARMA LTD. is in the business of manufacturing and marketing pharmaceutical products. The corporate office is located at Mumbai and the manufacturing facilities in Palghar at a distance of about 105 Km from Mumbai.

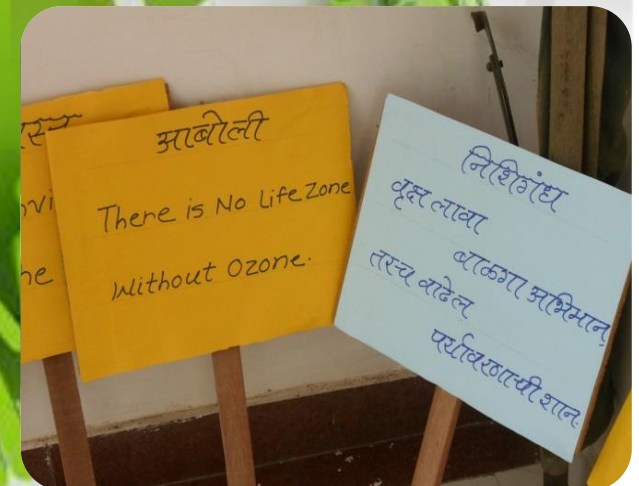

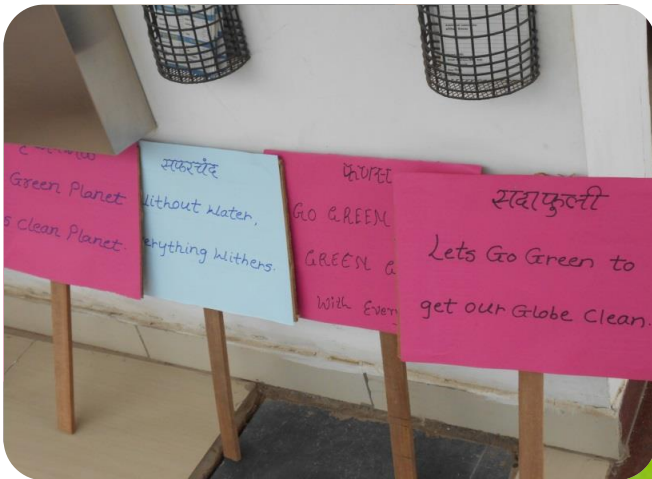

At Bliss GVS Pharma Limited., the organization has established, documented & implemented Integrated Management System comprising of the Environmental Management System and Occupational Health and Safety Assessment Series in accordance with the standard requirements. It is also ensured to be continually working for sustaining and improving the system.

In these facilities three types of dosage forms are being manufactured, namely Pessary/Suppository, Tablet & Dry syrup. As a part of Annual EHS Monitoring Plan & Corporate Social Responsibility, BGPL Safety Committee Members initiated a *World Environment Day celebration (05th June 2014)* at BGPL Palghar plants.

Event

The idea was to form groups of all employees & to do the tree plantation in front space of the company. Total 30 groups were formed with 3-5 members in each group. Flowers & fruits names were selected to designate each group. Environment slogan was assigned to each group & boards containing group name & slogan were prepared.

A rally was organized to create awareness in surrounding peoples.

After rally is over a small speech on Environment Protection was given by Mr. Sunil Vasaikar & Mr. Sunil Thakur & the event was started. The employees of BGPL volunteered their time and labor for the social cause. The event started at 04:30 am under the pleasant sunshine.

As all the participants moved around finalizing the arrangements and finishing the jobs assigned to each, the employees of BGPL began the drive one by one. At the same time, employees who volunteered to help in the tree planting programme began their warm-up to make necessary arrangements.

After explaining the procedure to be followed while plantation, the tree planting programme began. The first sapling was planted by Mr. Sunil Thakur. Then the whole team; inclusive of the contractors and BGPL employees; picked up saplings, removed the bag around them, placed them in the pit, filled the pit with soil and watered the plants. Some of the employees carried cans full of water to the saplings, and some participants raked the soil into the pits. All in all, 30 saplings were planted within 30 minutes!

It was indeed an encouraging spectacle to see the will and determination of BGPL employees and its senior staff to show gratitude towards mother nature. Every face in the picture indicates the satisfaction of contributing their bit towards conserving the environment.

After-care

Only planting the trees is not enough. Because, planted trees may be destroyed by animals or otherwise, or may die without regular service of water. So we should be particular about the after-care of the planted trees. The responsibility of the planted trees is taken by BGPL.

As the participants washed their muddy hands and cleansed them, they were immediately served soft drinks. No one was tired – everything was over by 05.30 pm. The participants and the employees left for the day, filled with refreshments and the satisfaction of adding more trees to the environment.

BGPL- PALGHAR: SAFETY COMMITTEE MEMBERS

**BLISS GVS PHARMA IS COMMITTED TO PRESERVE & CONSERVE THE ENVIRONMENT AND
IN FUTURE WILL KEEP ORGANIZING THIS KINDS OF EVENTS.**
